

# *POLK ASSOCIATION of CODE ENFORCEMENT*

Presents:

## *Chemical Suicides*

For  
First Responders & Field Personnel

**DATE:** April 20, 2012

**TIME:** 9am - 12pm

**LOCATION:** 1104 Martin Luther King Jr., Ave  
Lakeland, Florida

Light refreshments will be provided starting at 8:30

Chemical suicides are a hazardous and disturbing trend that is growing in the United States. The Center of Disease Control reports the number increased from two in 2008 to eighteen in 2010. Many contribute this to the internet and easy access to materials. In a few cases law enforcement officers and first responders have sustained injuries because they failed to recognize and take precautions. This class gives you the information you need to:

- Identify a chemical suicide site
- Precautionary measures and response techniques
- Commonly used chemicals and their hazards
- Decontamination and clean up of the site

Don't miss out on this very important training for all first responders and field personnel.

### Instructor

Deputy Chief Jacob Oreshan III

New York State Office of Fire Prevention & Control / Hazardous Materials / Homeland Security Bureau

Deputy Chief Oreshan has 25 years of experience is a New York State certified firefighter, fire officer, fire service instructor, code officer, fire investigator, and hazardous materials specialist as well as a national certified and hazardous materials responder
